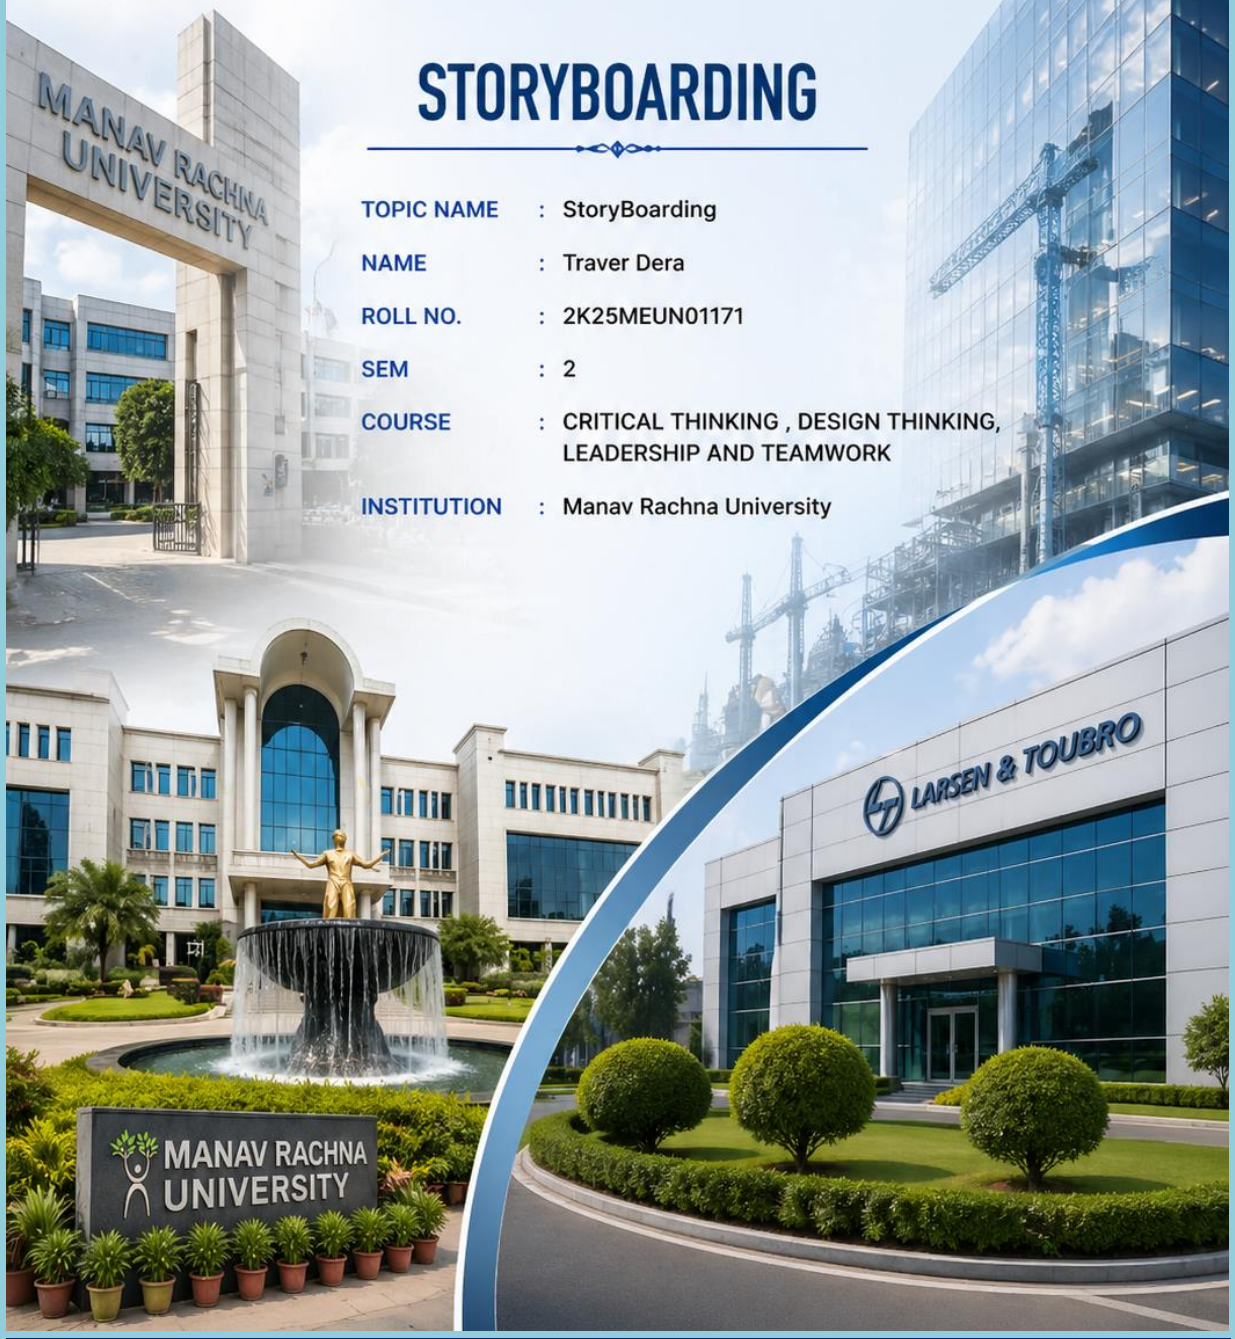
STORYBOARDING

TOPIC NAME	:	StoryBoarding
NAME	:	Traver Dera
ROLL NO.	:	2K25MEUN01171
SEM	:	2
COURSE	:	CRITICAL THINKING , DESIGN THINKING, LEADERSHIP AND TEAMWORK
INSTITUTION	:	Manav Rachna University



1. Introduction

Storyboarding is a visual technique used in design thinking to represent a user's journey step-by-step. It helps in understanding problems, visualizing solutions, and communicating ideas effectively.

In this task, a storyboard was created to demonstrate a real-life problem related to dehydration and a proposed solution using a smart hydration system.

2K25MEUNO171

2. Objective

- To understand the concept of storyboarding
- To visualize a real-world problem and its solution
- To apply design thinking in a structured and creative way

3. Problem Description

Many students and working individuals forget to drink water due to busy schedules. This leads to dehydration, causing fatigue, reduced concentration, and lower productivity.

4. Proposed Solution

The solution proposed is a **Smart Hydration Reminder Bottle**.

Key Features:

- Tracks daily water intake
- Sends reminders through light or mobile notifications
- Easy to use and portable
- Encourages healthy hydration habits

5. Storyboard Explanation

The storyboard was divided into multiple scenes to represent the user journey:

Scene 1: Problem
A student studies for long hours and forgets to drink water, leading to tiredness and lack of focus.

Scene 2: Introduction of Solution
The student gets a smart hydration reminder bottle.

Scene 3: Working of the Product
The bottle monitors water intake and sends timely reminders to the user.

Scene 4: Result / Impact
The student starts drinking water regularly, resulting in improved energy and concentration.

Conclusion
Proper hydration leads to better health and performance.

Future Scope
The product can be enhanced by integrating AI, mobile health apps, and wearable devices for personalized hydration tracking.

2K25MFUN01171

6. Tools Used

- Lucidchart (for storyboard creation)

7. Learning Outcomes

- Gained understanding of visual storytelling techniques
- Improved problem-solving and creative thinking skills
- Learned how to present ideas clearly using diagrams
- Understood user-centered design approach

8. Conclusion

Storyboarding helped in clearly visualizing the problem and solution in a structured format. The Smart Hydration Reminder Bottle demonstrates how simple technology can improve daily habits and promote a healthier lifestyle.
